

HIP MUSCLE  
GLUTEAL MUSCLE  
TO COUNTERACT  
PELVIC TILT

FOR RUNNING  
AND  
LEAPING

FEMALE MALE  
TALLER

WIDER HIPS IN  
PROPORTION  
TO BODY

LONGER  
LEGS IN  
PROPORTION  
TO BODY

NARROWER HIPS  
IN PROPORTION TO  
BODY

SHORTER  
LEGS IN  
PROPORTION  
TO BODY

WHEN PERSON HITS PUBERTY → THEN BONE STOPS DEPOSITING  
THEREFORE, IF PUBERTY IS DELAYED → THEN IS MORE BONIER-LOOKING  
HEAVY BONED

MATURITY — TAKES A WHILE FOR BODY TO CATCH UP TO LEGS (IN GROWTH)  
THEREFORE, WOMEN MATURE EARLIER → LONGER LEGS

FEMALE

SMOOTHER BROW

ROUNDER JAW-LINE

MALE

MORE DEFINED BROW

MORE SQUARED-OFF JAW-LINE

→ WOMEN MATURE EARLIER (TO HAVE BABIES)

SINCE → MORE BONE DEPOSITS, THE LATER ONE MATURES,  
IT IS LOGICAL THAT MALES WOULD HAVE "HEAVIER"  
BROW + JAW BONE.

FAT DEPOSITS

FEMALE

MALE

MALES HAVE LARGER  
- MORE DEFINED M

HEAVIER CLAVICLE

GLUTE

WHERE IT  
WOULD  
HANG
